

Bona Remover

POLISH REMOVAL AGENT

Concentrated polish remover safe on wood

Bona Remover is a concentrated polish remover with balanced pH for safe use on wood flooring. In addition to removing polish, it is also effective for removing scuff marks. Low foaming and low odour. Adapted for wood but possible to use on most types of water-resistant floorings including tiles, vinyl, and linoleum floors.

- Balanced stripping agent for safe use on wood
- Effective on Bona's Polishes and many other types of polish
- Concentrated

TECHNICAL DATA

pH-value:	Concentrate ca. 9 Working solution ca. 8
Dilution:	1 liter to 1-5 liters of water (17-50 % of Remover)
Application tools:	Nylon pads, buffing machine, cleaning mop
Shelf life:	At least 2 years, from the date of production, in unopened original container
Storage/Transport:	The temperature must not fall below +5°C or exceed +25°C during storage and transport.
Disposal:	Wastes and emptied containers should be handled in accordance with local regulations.
Pack size:	10 x 1 liters (50 boxes per pallet)

Additional detailed information is noted in the appropriate Safety Data Sheet.

PREPARATIONS

Remove loose dust/grit using a vacuum cleaner, scissor mop or other dry-cleaning method. Bona Remover can be used in concentrations 1:1–1:5. Test on a small area to determine the concentration required to influence the polish. The upper polish layer should be significantly softer and easy to scratch within 5 minutes if the concentration is satisfactory

Bona Remover

POLISH REMOVAL AGENT

Concentrated polish remover safe on wood

APPLICATION

1. Apply the diluted product to a section of the floor using a mop or spray equipment. Allow the solution approx. 5 minutes to dissolve the polish.
2. Scrub the section using a buffing machine equipped with a red or green pad.
3. Immediately remove the dissolved polish with a wet vacuum or the Bona PowerScrubber. Alternatively, a mop and a bucket of clean water can be used.
4. It may be necessary to re-apply Bona Remover several times depending on how thick the old polish build up is.
5. When the entire floor has been treated, clean once more with only pure water. It is important that all traces of Bona Remover are removed before applying a new layer of polish or refresher.

Note: The amount of water applied to the floor must be kept to a minimum. Pay attention to large gaps in the floor, do not allow excessive amounts of cleaning solution to seep into open gaps

Removal of scuff marks

Mix a 20% concentrate in a spray bottle. Spray the diluted product to the scuff mark or the affected area. After a few minutes scrub with a gentle non-abrasive scouring pad (white or red pad) and wipe off.
